

AidMomin.com

Needy ↔ Aid Institutions ↔ Donors

Providing a Platform service to connect Donor to Needy via Institutions.

Donors want

- Visibility for; Appropriate Need assessment & Use/benefit of funds provided

Aid Institutions want

- Higher Funding from donors
- Eligibility Verification by trusted verifiers
- Easy Recordkeeping of all transactions at detail needy level, to fulfill donor & Compliance requirements

Needy want

- Easy method to seek aid & provide information
- Kept informed of Aid possibility
- Receive the Aid quickly direct or to the designated institutions

All stakeholders can use any device from anywhere at any time to achieve the result of *Higher Aid delivery to the deserving, transparently & efficiently.*

Platform provides Institutions independent control of data of Donor /Verifier/Needy.

 KHOJA SHIA ITHNA ASHARI JAMAT (MUMBAI)	 KSI MEDICAL AID & WELFARE SOCIETY
 Progressive aiding progress	 JAFFERY FOUNDATION

Developed by  **FAHM**
Aiming Beyond Technology

PROCESS a Central Platform / Site Automation for Aid delivery

1. REACH OUT to deserving Momins through Facilitators;

Institutions have database of Masjid Madresa and imambargah in India including Alimaan has its own, Tanzeem makatib Lucknow has 1000 locations etc. who can be facilitators.

Marketing to be done to Facilitators to explain the scheme by AidMomin.org / Channel WIN, to inform deserving to apply for aid. The facilitators & opinion makers, madressa teachers, masjids then inform community and youth, i.e. reach out in various ways notices, message, in majalis etc.

Most financial support is *reactive* in nature, i.e. when somebody approaches the institution. AidMomin.org considers a *proactive* process of reaching out to needy.

2. APPLICATION Form entered by Needy

Needy/Student becomes aware from this 'Reach out' through facilitators /WIN Marketing and fills in application online from phone (either himself or takes help to do so) to a selected Institution or all institutions. Can also in advance download form (eg Education Forms link)

Each Aid Organisation can have own form for the type of Aid sought, though it is preferred to have common form agreed for each type of Aid.

3. VERIFICATION by registered verifiers

Needy can upload own verification of local reference 'verifier' with application. By attaching a picture.

Al Imaan already has a list of 250+ verifiers located all over India entered in the database. Institutions may use same if permitted by Al Imaan or enter their own verifiers.

The Institution allocates the form received to one of its verifiers

Verifier provides reference on line or on uploaded form confidentially.

4. Institution Approval & Listing for donor

Verified Form is seen by Institutions validator who scrutinizes checks eligibility and calls local verifier person and/or applicant if necessary & validates genuineness eligibility & clears it for inclusion in their own Needy database of "Awaiting Aid"

Institutions periodically makes appeal (Appeal Format) to donors clubbing Applications, classifying if Huqooq funds eligibility, and provide password to their own donors to view all /select Needy cases listed in their database.

5. Funding Aid & Payment

Donor will view cases & select cases for funding & remit amount to Institutions designated bank a/c.

Upon receipt of funding, Institution coordinates with Needy & makes payment direct to School /College /Medical Institution etc. & uploads evidence in database. This is made visible to Needy & Donor

6. DATABASES

Databases searchable maintained on cloud for access from any device anywhere at any time .

EACH institution will have its OWN databases & can share if it so wishes with others :-

Needy Database Each Institution has its own needy database tagged with type of Aid with all related info incl payment evidences

Donor database: Each Institution has its own Donor database

Verifiers/ Validators databases are maintained

Aid delivery partners/ Facilitator /Religious institutions, Schools , Clinics etc databases which participate in Aid delivery

7. Recordkeeping /Reporting

All record keeping is done by system & effort to maintain records by institutions & provide them for governance is drastically reduced

Institution can require Needy Applicant to upload docs eg. exam results , required periodically through his own login or by sending to Institution data admin contact point

All reports /xl downloads are easy to get with different permutations & combinations of variables ie aid type /donor .dates etc can be provided,

A separate CRM module for easy communications with all stakeholders databases is also possible to be provided

8. Confidentiality is maintained & the cloud platform has a secure database under the management & control of Fahm technologies a Momin venture providing the platform

The future possibilities are many & the system can be refined for each institution

The process previously developed for Education Aid for EPIINDIA.org is given in next page

Overview of Application Process
